Re: *Notice & Ex Parte Presentation, WT Docket No. 06-150,
Service Rules for the 700 MHz Bands*

Dear Ms. Dortch:

On May 21, 2007, Thomas Tauke of Verizon Communications and Steven Zipperstein of Verizon Wireless met with Chairman Martin and Erika Olsen, Legal Advisor to the Chairman. Messrs. Tauke and Zipperstein's presentation was consistent with the written filings that Verizon Wireless has submitted in this proceeding. They discussed the importance of including large license blocks in the band plan for the 700 MHz commercial spectrum, avoiding burdensome buildout rules, and allowing all qualified entities to bid for all licenses, without restrictions on eligibility or the services that could be offered to meet customers' needs. They also stressed the importance of adopting rules that established a proper framework for the deployment of an effective broadband communications network for first responders, by allowing Public Safety to negotiate partnerships with interested commercial operators that can best meet Public Safety's needs.

Please direct any questions regarding this letter to the undersigned.

Sincerely,

A handwritten signature in black ink that reads "John T. Scott, III". The signature is written in a cursive, slightly stylized font.

John T. Scott, III

cc: Erika Olsen
